

33-36 Series

Special Applicator Heads

Customized for woodworking applications.

vanSCO's 33-36 Series Special Applicator Heads are ideal for woodworking applications. The applicator heads are available in RX, snap, or threaded connectors and can be used with the VanSCO® 47 Series pneumatic adhesive valve for automatic operations or the 60 and 61 Series hand valve for manual operations. Special pattern sizes and orifice sizes are available.
